

Chemtrails Are Not Contrails

Our eyes do not deceive us. There is something very wrong in our skies!

KC-10 and KC-135 type tankers are systematically spraying chemicals into our air supply. These thick white plumes, giant X's and grid patterns increasingly dominate the sky. This chemical haze hangs in the sky for hours, spreading out into artificial cirrus-like cloud cover. Even trails that dissipate quickly, whiten and bleach blue skies!

What's being sprayed? The air we breathe is laden with asbestos-sized synthetic fibers and toxic metals, including barium salts, aluminum oxide, and radioactive thorium. Poisonous on par with arsenic and a proven suppressant of the human immune system, atmospheric barium weakens human muscles, including the heart. Inhaled aluminum goes directly to the brain and medical specialists confirm it causes oxidative stress within brain tissue, leading to formation of Alzheimer's like neurofibrillary tangles. Radioactive thorium is known to cause leukemia and other cancers.

Why is this happening? Government denial and a media blackout has caused much speculation regarding the reasons for open air spraying. One aerosol project has been dubbed Operation Cloverleaf probably due to its multifaceted operations, which include: weather modification, weather warfare, military communications, space weapons development, global warming research and biological test agents. These test agents include combinations of viruses, bacteria, fungi, mycoplasma and genetically engineered biologicals. Congressional laws allow military testing on the American population. This includes you and your family.

Where is the proof? Despite official denial, massive amounts of documentation exist. U.S. patents, governmental documents, congressional legislation, lab samples, photographs, videos and eyewitness testimonials confirm the aerosol spray operation is real and ongoing. The spraying continues offshore, at night, above cloud cover and in plain sight. Do your own research on Google or take Congressman Dennis Kucinich's word. His original bill H.R. 2977 'Space Preservation Act of 2001' refers to chemtrails as an exotic weapon system. Read "Clouds of Secrecy" by Leonard A. Cole. He documents 20 years of military aerosol testing on American populations complete with congressional hearings. (ISBN: 0847675793)

Health affects caused by these lung-clogging toxic metals, biologicals, particulates and polymers are: Asthma and allergies, flu and flu like symptoms, respiratory illness, dizziness, fatigue, chronic cough, headaches, sore throat, itchy eyes, skin rashes and short term memory loss. Children, the elderly and those with weakened immune systems are especially affected.
