This rainbow jet trail is not normal, and neither are the low-level brown chemical clouds

Santa Monica, 2/9/00

Weather Modification? Missile Defense Technology? Protection from a depleted ozone layer? Mass Vaccinations? Who knows? One thing is for certain, what you are seeing is not normal, and no one in politics or the media is talking about it.

This is not meant to panic, but to inform. There are now well over 200 Web sites on the internet dealing with this massive, orchestrated campaign to conduct some type of chemical spraying in the atmosphere above major cities in the U. S. and around the world. There are those who would have you believe that what you are seeing in these photographs are normal jet contrails. Use your eyes and your heads, Americans! Wake up and demand answers now.

Santa Monica 6/7/00

This spraying is affecting the health of millions of Americans. If this is something being done "for our own good," why are we not being told?
