

Chemtrail Flu: Have You Got It Yet?

You're sick. Your nose is stuffy. Your body aches, You're sweaty, coughing, sneezing and you don't have enough energy to get out of bed. It's not the flu. It's a conspiracy, according to Dr. Len Horowitz. His opinion is not based on conspiracy theory but on conspiracy FACT.

"I believe the chemtrails are responsible for a chemical intoxication of the public, which would then cause a general immune suppression, low grade to high grade, depending on exposure. The immune dysfunction allows people to become susceptible to opportunistic infections, such as this micoplasma and other opportunistic infections", says Dr. Horowitz.
