

AERIAL MIND-CONTROL: THE THREAT TO CIVIL LIBERTIES

by Judy Wall

Excerpts from Nexus Magazine Oct/Nov 1999

The US Air Force's Commando Solo aircraft are used to broadcast subliminal radio frequency messages to manipulate the minds of military and civilian targets.

USAF COMMANDO SOLO: AERIAL MIND-CONTROL BROADCASTS

The United States Air Force uses aerial mind-control broadcasts against civilian populations as well as enemy troops. Some of these actions against civilians are done with the intent of influencing public opinion and the outcome of elections. In a previous article, we examined mind-control technology, especially those that are utilising Silent Sounds™, in which radio-frequency broadcasts carry subliminal patterns that entrain the listener's brainwaves into a preselected emotional state. According to ITV wire service reports, this technology was used during Operation Desert Storm in 1991, as part of US Psychological Operations (PsyOps) directed against Iraqi troops.

To the Desert Storm offensive we can now add several other incidents. Alex Horvat, editor of The Probe, calls to our attention the 1998 video, Exotic Weapons of Mass Control, produced by Bob Fletcher. "The excerpt played on Fletcher's video is from TLC [The Learning Channel] and clearly states that Commando Solo was used in Haiti for what was called Operation Uphold Democracy. As the general populace was violently opposed to Aristide and most in favour of his ouster, it took nearly a year of this clandestine counter-programming to get them to change their minds... Instead of butchering a population physically, we can now manipulate them mentally, virtually enslaving their thoughts with a criss-cross pattern of flights by an EC-130 (which is just a C-130 heavily laden with electronic hardware)."

We were not at war with the citizens of Haiti, yet the US Government directed military weapons against this friendly, or at least neutral, civilian population. The US Government sanctioned the "rigging" of the Haitian election by mental control of the people, programming them to cast their votes for the Americans' favoured candidate. And they had the nerve to call it "Operation Uphold Democracy". Some sense of humour! Stalin would have loved it. Hitler would have loved it. Why is the US Government doing this? Who is behind this flagrant violation of civil liberties? Is it the US Central Intelligence Agency (CIA), which has a long history of interfering in foreign government politics? Or has this become standard military procedure?

This rationale is always the same: "to make the world safe for democracy". Yet what is democracy if not freedom? Freedom to think your own thoughts; freedom to express your own opinions; freedom to vote for the candidate of your own choice.

Fletcher's video also mentions that the same technology was used against the Bosnia population for a week to influence their election. This was probably done during Operation Joint Guard in 1995.

The questions arise: If they have used mind-control broadcasts against foreign civilian populations to influence elections, will they use them against American citizens - or have they already? What other countries may be the recipients of this innovative technology?

Just what is this EC-130 Commando Solo? The United States Air Force has helpfully published a Fact Sheet that describes the Lockheed-build aircraft. This 1995 bulletin states that the "unit flyaway cost" is more than US\$100 million each, and that there are eight in the inventory. Its primary function is "Psychological operations broadcasts". The crew consists of four officers (pilot, copilot, navigator, control chief/EWO) and seven enlisted members (flight engineer, loadmaster, five mission crew). According to the Fact Sheet:

"Air Force Mission: Commando Solo conducts psychological operations and civil affairs broadcast missions in the standard AM, FM, HF, TV and military communications bands. Missions are flown at maximum altitudes possible to ensure optimum propagation patterns. The EC-130 flies during either day or night scenarios with equal success, and is air refuelable. A typical mission consists of a single-ship orbit which is offset from the desired target audience. The targets may be either military or civilian personnel. "Secondary missions include command and control communications countermeasures (C3CM) and limited intelligence gathering.

"Air Force Features: Highly specialised modifications have been made to the latest version of the EC-130. Included in these modifications are enhanced navigation systems, self-protection equipment, and the capability of broadcasting colour television on a multitude of worldwide standards throughout the TV VHF/UHF ranges...

"Air Force Background: Air National Guard EC-130 aircraft flown by the 193rd Special Operations Group were deployed to both Saudi Arabia and Turkey in support of Desert Storm. Their missions included broadcasts of 'Voice of the Gulf' and other programs intended to convince Iraqi soldiers to surrender.

"The EC-130 was originally modified using the mission electronic equipment from the EC-121, known at the time as the Coronet Solo. Soon after the 193rd SOG received its EC-130s, the unit participated in the rescue of US citizens in Operation Urgent Fury, acting as an airborne radio station informing those people on Grenada of the US military action.

"Volant Solo, as the mission is now known, was instrumental in the success of coordinated psychological operations in Operation Just Cause, again broadcasting continuously throughout the initial phases of the operation..."

Operation Just Cause? This is another propaganda name, applied to the US invasion of Panama to take out that country's leader, General Noriega, the CIA's erstwhile partner in drug smuggling. Apparently the General had made someone mad - how else to account for the massive invasion of this tiny tourist country? To wit: "A superpower whipped the poop out of 10 per cent of the police force of a Third World nation. You are supposed to be able to do that. It was done well, and I credit those who did it. But it is important that we draw, the right lessons from it, "according to an anonymous US Marine. Our Commander-in-Chief had another point of view: "...the roll call of glory, the roster of great American campaigns - Yorktown, Gettysburg, Normandy, and now Panama." - President George Bush, March 1990
