

Important international investigation !

On 17th August 2009, I lodged a complaint with examining magistrate Jean-Claude Claeys of Gent, Belgium, against " the intentional and systematic spreading of chemical and biological substances in the atmosphere which are harmful to public health ".

The reference number of this procès-verbal is 185/09.

Shortly afterwards I started the citizens' initiative "Belfort-group" in cooperation with which I am organizing an international symposium on this same subject, on 29th May 2010.

Exercising pressure by different means will remain crucial even in the future.

One of the possibilities available consists in **lodging a complaint with the local police** who is then legally bound to drawing up a process-verbal! One may specifically **request that this protocol be linked to my complaint, case number 185/09**, with the examining magistrate, Jean-Claude Claeys, Opgeëistenlaan 40 1/B, 9000 Gent, Belgium.

Your cooperation is crucial in that it increases the international pressure on this issue.

Thank you in advance for your courageous and determined contribution to dispelling chemtrails.

Combative greetings,

Peter Vereecke
