

# **YOU ARE BEING SPRAYED FROM ABOVE LOOK UP !!!!**

## **The sky is changing.**

Have you noticed long airplane trails that spread out and last for much longer than they used to ?

Have you noticed grid patterns laid out in the sky above?

If not then LOOK UP NOW! Chances are as you read this they are up there laying Trails containing Barium, Aluminium and a number of organic materials. They are Spraying with increased frequency and they refuse to tell us what they are doing - The head of our MOD says she cannot comment on ongoing operations!

Patents can be found online that mention weather modification, climate control and aerosolised military aerals.

These Trails could be any one of these things – but the chemicals they contain are toxic and can cause respiratory problems, migraines, allergies and Morgellon's disease – all of which are on the rise!

Think our government wouldn't harm you? Think again! They have admitted spraying thousands with bacteria attached to spider webs and various chemicals as tests for potential biological / chemical weapons

(see <http://www.guardian.co.uk/Archive/Article/0,4273,4398507,00.html>)

Many MPs are lobbying parliament to find out what they are doing to us, join them, ask questions, do your own research and tell everyone you care about!
